

Newbrel Facilities List

- Extensive stocks of Aluminium, Steel and Pre-Galvanized Steel in varying sizes and thickness.
- 3 CNC Guillotines MAX size 4 metre x 10mm thick.
- 2 x Trumpf TC500 CNC Punch Press for Punching, Notching PERFORATED holing of panels, brackets etc, MAX Process area 3000 x 1600 (without re-positioning).
- 4 x Amada HF Series CNC Press Brakes for forming/folding of sheet metal components. All machines.
- 1 x Kaltenbach Auto Cutting Saw (ALUMINIUM) used for cutting extrusions to accurate length.
- 1 x Perris Cut Off Saw (ALUMINIUM) used to cut small quantities of extrusion.
- 2 x Kingsland XS 85 Steelworker, used for manual punching Aluminium and Steel plate and extrusion.
- 3 x Manual Pedestal Drill.
- 1 x Aluminium Router.
- 1 x Initial Pinch Pyramid Rolls (max length 4 metres) used to produce curved Columns, Bullnoses, etc.
- 8 x Various Welding sets including T.I.G, M.I.G, ARC & Spoolmatic for welding of Aluminium, Steel & Stainless Steel.
- 1 x Beamsaw for accurate production cutting of foam and Timber.
- 1 x Panel Saw, used to cut timber/foam infill for panels.
- 2 x Vacuum Bonding Machines, used to vacuum bond composite panels.
- 1 x Hot Wire Cutter, used to cut special sizes of foam for composite panels.
- Extensive stocks of various foam products for composite panels.
- Newbrel can arrange via reliable sub-contractors, various post processing including Powder Coating, Zinc Plating, Galvanizing, Anodising and Transport.
- Delivery Vehicles, 1 x DAF 71/2 TON 7000 x 2400 Flat Bed Lorry, 4 x Mercedes Sprinter Pick-Up Trucks 4200 x 2000 Bed Size.
